PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with demonstrated expertise in the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, TypeScript, and PostgreSQL. Experienced in designing and shipping production-ready web applications — including real-time chat platforms and full-featured e-commerce systems — with a consistent focus on performance, security, and scalable architecture. Proficient in RESTful API design, JWT authentication, role-based access control, WebSocket communication via Socket.io, and modern CI/CD deployment pipelines. Holds a Registered Computer Engineer designation from the Nepal Engineering Council. Seeking an entry-level or internship role to deliver impactful, high-quality software within a collaborative engineering team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Redux Toolkit, Redux Toolkit Query, Tailwind CSS, Bootstrap, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, OAuth Basics, Socket.io

Databases: MongoDB, Mongoose, PostgreSQL, Schema Design, Joins, CRUD Operations

DevOps & Tools: Git, GitHub, Vercel, Render, Netlify, VS Code, Postman, MongoDB Atlas, MongoDB Compass, Figma

Core Concepts: MVC Architecture, Agile Development, Debugging, API Integration, WebSockets, RBAC

PROJECTS

E-Commerce Web Application (HeavenCraft) · MongoDB · Express.js · React.js · Node.js · Redux Toolkit · Tailwind CSS · JWT [🔗 Live Demo](#)

- ▶ Architected and delivered a production-deployed, full-featured e-commerce platform supporting product listings, search, shopping cart, and secure multi-step checkout — live at [mern-frontened.vercel.app](#).
- ▶ Engineered JWT-based authentication system with role-based access control (RBAC), separating customer and admin permissions across all API endpoints.
- ▶ Designed a normalized MongoDB schema using Mongoose for products, orders, and users, enabling efficient querying and data integrity across the platform.
- ▶ Implemented Redux Toolkit Query for client-side state management, reducing redundant API calls and improving UI responsiveness by eliminating prop-drilling across 10+ components.
- ▶ Integrated Stripe-ready checkout flow with order tracking and admin dashboard for inventory and order management.

- ▶ Deployed frontend on Vercel and backend on Render with environment-based configuration and CORS policy enforcement.

Real-Time Chat Application · MongoDB · Express.js · React.js · Node.js · Socket.io · JWT · Tailwind CSS [🔗 Live Demo](#)

- ▶ Developed a production-deployed real-time messaging platform enabling instant bi-directional communication between users, live at chat-app-five-blue-45.vercel.app.
- ▶ Implemented WebSocket communication using Socket.io with event-based architecture (emit/listen pattern), achieving sub-100ms message delivery latency.
- ▶ Built secure user authentication and session management using JWT tokens with HTTP-only cookies, protecting all socket connections from unauthorized access.
- ▶ Designed real-time presence indicators (online/offline status, typing indicators, join/leave notifications) to enhance UX during live conversations.
- ▶ Persisted all messages and user data to MongoDB, enabling chat history retrieval across sessions via REST API endpoints.
- ▶ Created a fully responsive React UI with Tailwind CSS, ensuring seamless experience across mobile and desktop viewports.

EXPERIENCE – MERN STACK Developer Intern

Mindrisers Technology | Nov 2025 – April 2026

- ▶ Worked on the development of a modern web platform for an emerging EV mobility startup in Nepal preparing for its future launch.
- ▶ Built responsive and user-friendly frontend interfaces using React.js, Next.js, and Tailwind CSS.
- ▶ Developed reusable UI components and improved website performance and responsiveness.
- ▶ Assisted in backend integration using Node.js and Express.js for dynamic functionality.
- ▶ Worked with MongoDB for data management and application storage.
- ▶ Collaborated with team members using Git and GitHub for version control and project workflow.
- ▶ Participated in debugging, testing, and optimizing application features across multiple devices.
- ▶ Gained hands-on experience in full-stack MERN stack development within a startup environment.

EDUCATION

- ▶ **Bachelor of Engineering — Computer Science**
Bangalore Institute of Technology (VTU), Bangalore
- ▶ **Higher Secondary Level — Science**
Greenland College, Biratnagar, Nepal
- ▶ **School Level (S.E.E.)**
Little Star Secondary School, Lahan, Nepal
- ▶ **Registered Computer Engineer** — Nepal Engineering Council (NEC)
